

FOOD SEER

FOOD CHOICES CAN GET OVERWHELMING FAST. ESPECIALLY WHEN YOU'RE HUNGRY, TIRED, AND THE MENU STARTS TO LOOK LIKE A 50-PAGE NOVEL. FOOD SEER TAKES THE STRESS OUT OF DECIDING WHAT TO EAT BY TURNING MEAL SELECTION INTO A NATURAL, CONVERSATIONAL EXPERIENCE. USERS CAN ANSWER A QUICK, FRIENDLY QUIZ OR CHAT WITH OUR OLLAMA-POWERED ASSISTANT TO GET A TAILORED RECOMMENDATION BASED ON THEIR BUDGET AND PREFERENCES. NO SCROLLING THROUGH ENDLESS DISHES. NO SECOND-GUESSING. JUST A SHORT INTERACTION AND A MEAL SUGGESTION THAT FITS THE MOMENT.

DISCORD

Version 1

- Back-end: Implemented systems for inventory management, user management, user preferences, order management, account creation, and session handling.
- Front-end: Designed a clean, intuitive UI with tab-based navigation, allowing users to switch between ordering, recommendations, and account features seamlessly and place orders without friction.
- Quiz system: Developed a guided quiz flow to generate meal recommendations based on user input.
- AI chat-bot: Expanded the quiz system by integrating an Ollama-powered chat interface, enabling conversational meal recommendations.

Version 2

- Chat-bot history: Added persistent conversation memory to store past orders and preferences for context-aware recommendations.
- Recommendation feedback: Integrated rating and review flow to refine future suggestions and improve model accuracy.
- Analytics dashboard: Built real-time insights for admins and businesses, including top items, user trends, and conversion metrics.
- Driver side: Implemented driver module for order assignment, status updates, and live delivery tracking.

Stackholders

- Admins: Manage inventory, analytics, feedback, and system configuration.
- Customers: Receive personalized recommendations, place orders, give feedback.
- Drivers: Accept deliveries, update order status, enable real-time tracking.
- Restaurants: Oversee menus, monitor orders, view analytics, manage operations.

Version 1 Test Cases: 122 Vs. Version 2 Test Cases: 170

Version 1 Test Coverage: 80% Vs. Version 2 Test Coverage: 85.2%
